

## Joikusoft and FON unveil Wi-Fi HotSpot software for Mobile Phones

Press release

08/08/2008, Espoo, Finland

Joikusoft, the mobile software development house, maker of the mobile Wi-Fi HotSpot software JoikuSpot, announces a collaboration with FON, the world's largest WiFi community. FON and Joikusoft are releasing an exclusive version of Joikusoft's mobile hotspot solution, named FonSpot. FonSpot turns a mobile phone into a Wi-Fi HotSpot, enabling any laptop, iPod Touch, internet tablet or other Wi-Fi device to connect to the Internet using any compatible mobile phone as a secure high speed Internet gateway.

FonSpot with Wi-Fi will effectively replace Bluetooth, cable and USB dongles to access the Internet using mobile phones and 3G connectivity. The FonSpot is a fully secure mobile internet HotSpot solution, and makes use of the maximum security offered by the underlying Symbian OS platform. The users have full control over who will be able to access their FonSpot's wireless internet connection.

FonSpot is an exclusive offering for members of the FON community. Foneros will be able to share their mobile Internet connection with up to 5 friends, who can connect to their FonSpot. It will be made commercially available for Foneros during 3Q 2008.

According to the Joikusoft Chairman and Founder Mr. Tom Ojala "FON is a perfect companion to roll out wireless Wi-Fi access in mobile phones as FON already has an established user base of hundreds of thousands of physical FON Wi-Fi base-stations. FON users will now enjoy even broader access to internet wherever they are, literally carrying internet in their pocket."

Alexander Puregger, FON's Director of Business Development, states, "FON is very glad to work with Joikusoft as the company is proving to be an innovative contributor to the proliferation of Wi-Fi. And FON is all about WiFi everywhere!"

### About Joikusoft

Joikusoft is a software development house focusing on mobile innovation. The Joiku mission is to liberate mobile internet with mobile Wi-Fi HotSpots. Joikusoft has developed a mobile Wi-Fi HotSpot software client called JoikuSpot for S60 Smartphones. User base of JoikuSpot exceeded 300.000 in June 2008 and grows exponentially. Joikusoft was the first in the world to roll out a mobile Wi-Fi HotSpot solution in February 2008 at 3GSM Barcelona. Joikusoft is a privately held company, founded in 2007 in Finland and has headquarters in Garden City, Espoo, Finland.

## About FON

FON is the world's largest WiFi community. FON's mission is to stimulate the growth of WiFi around the world by creating a global community of "Foneros". FON's La Fonera routers have been designed to enable Foneros to share their home Internet access in a completely secure manner. Founded in February 2006 in Madrid, Spain, FON investors include Google, Skype, Index Ventures, Sequoia Capital and British Telecom. Currently FON has over 250.000 hotspots worldwide and more than 900,000 registered members in Europe, Asia and America.
